

NinjaTrader is the preferred active trader platform for traders worldwide including our clients. We are pleased to offer NinjaTrader to our clients for many reasons but one great reason is that you can get started with NinjaTrader for Free! Why pay hundreds of dollars per month for products with less functionality when with NinjaTrader all you need is access to a real-time or historical data feed. You can also connect NinjaTrader to [Kinetick](#), our preferred market data service, for free End-of-Day data!

NinjaTrader provides superior order entry options!

If you are using the wrong trading platform, order submission and trade management can be a timely and error prone process. Since 2003, NinjaTrader has pioneered easy to use yet powerful order entry and trade management functionality to overcome the limitations of other trading platforms helping our clients better achieve their trading goals!

The innovative NinjaTrader SuperDOM and Chart Trader set the benchmark for order entry screens and is one reason we recommend it to our clients. Considered the industry's best order entry screens they provide traders with ease of operation, clear trade visualization and fast entry to capitalize on today's markets.

SuperDOM

- Easy to see trade visualization
- Single click order entry, modification and cancellation
- Can be use with Advanced Trade Management (ATM) module

NinjaTrader is the industry leader in trade management features!

Advanced Trade Management (ATM) is NinjaTrader's signature order management technology that lets you pre-define personal trade management strategies including; multiple profit targets and stop loss orders, one-cancels-other (OCO) orders, auto-breakeven stops, trailing stops and much more. This feature can significantly enhance trade performance by automatically submitting all entry/exit orders within milliseconds! This feature alone tends to cover the cost of the platform while simultaneously lowering your stress level by eliminating the "deer in the headlights" feeling commonly associated with manually managing multiple exit orders in fast moving markets.

Utilize NinjaTrader's comprehensive market analytics tools to help find trading opportunities!

Regardless of what markets you trade, what style of trader you are or if you require real time or end of day analytics, the NinjaTrader trading platform provides you the tools to analyze the markets and your trading ideas in a flexible, customizable and user-friendly manner that helps you trade better.

Charting

- Powerful market visualization
